

ATTACHMENT 2: RACK LABELLING

Examples: The Sample Label refers to the information in Fig 1 “TEBA Suite Dimensioning”.

The first example label below is for a Telstra equipment rack, such as a DP1B rack (eg: a DP1B rack located in the Ground Floor, Suite 115, Rack position 2)

The second example label below is for a carrier’s TEBA rack (with the Node Code of ABCD and rack located in rack position 4 of the same suite). The top line of the Rack Label details the Node Code for the carrier’s TEBA racks at that site together with the carrier name, and the lower line is the Floor/Suite/Rack number of the rack. The rack label on the rear of the rack should have the suite number of the suite behind the rack (eg: “GD/116/4”)..

Telstra
Equipment
Only Front

GD/115/2

Change
Suite No
for rear
rack label.

ABCD / Carrier Name

GD/115/4
