

Equant X.25

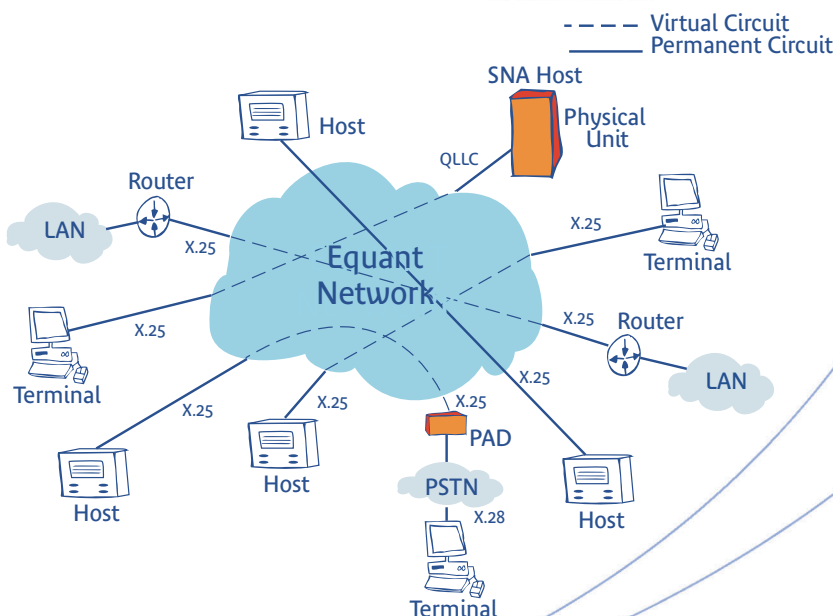

Proven, cost effective and available worldwide

▽ Keeping your business connected — everywhere

If your business depends on legacy or proprietary applications, you may not be ready to move to a newer networking technology. Count on Equant to help. While it is becoming increasingly difficult to find an X.25 service provider, Equant is continuing to support this proven and business-critical service.

Equant offers highly reliable, full-service and far-reaching X.25 solutions. Our experience and unique commitment to X.25 as an international service provider means your business applications are safe with Equant. And when you're ready, our experience and broad portfolio will be there to help you migrate your mission-critical applications to other protocols and services.

Link worldwide via permanent or switched virtual connections.

▽ Connections you've come to trust

Go far with X.25. Equant X.25 is available just about everywhere you do business on one of the world's largest public data networks. Connect your locations reliably and conveniently via a single global carrier and receive local language support.

Count on reliability. Built-in redundancy and automatic rerouting are trademarks of our service. We provide high throughput, high availability and excellent response times between your sites.

Tailor your network. Optimize savings and performance by choosing from a wide range of access options, billing options and transmission speeds based on applications, locations and traffic volumes.

▀ Benefits

- ▶ Expanded reach via our wide-ranging global network
- ▶ High reliability due to built-in network redundancy
- ▶ Cost savings through flexible billing options
- ▶ Time savings with a single point of contact
- ▶ Low risk by using a proven technology
- ▶ Cost effectiveness since Equant manages your connections for you
- ▶ Easier access to help with local support in every major city in the world.

▀ Equant X.25's strength

For many applications, X.25 is your preferred choice. Equant X.25 is the most reliable service you can have in some of the most remote locations for business-critical communications.

▀ A single source

Rely on Equant for all kinds of connections, from X.25 to IP, all around the world. We can support your business in so many ways, today and as your requirements change.

▀ Safe solutions

Your business applications will be readily supported by Equant. We know how you value X.25, and we're here to support you with your current infrastructure and work with you to find the optimal solution for the future.

Equant X.25

Proven, cost effective and available worldwide

▽ Go global with efficient connections

Flexible application support. Ideal for host-to-host communications for file transfers or database updates, PC-to-PC LAN connections for exchanging server and desktop PC files or e-mail, and connection of asynchronous terminals.

Wide range of access options. Opt for: direct access from 9.6 to 256 kbps via a leased line; private dial access from 2.4 to 19.2 kbps via the telephone network; and indirect access via another data network.

Virtual connections. Set up Permanent Virtual Connections (PVCs) between two or more X.25 devices. Or, choose Switched Virtual Connections (SVCs) to set up calls as needed. Support both types of connections on the same line.

Back-up services. Equant automatically redirects calls when a device is out of service. Local back-up access options include: dual leased lines; dial back-up over the local telephone network; or ISDN dial back-up.

Fast Select. Send up to 128 bytes of data without delay.

High security. With features such as closed user groups, call barring and call restrictions.

Pricing options. Choose usage-based or flat-rate pricing.

▽ Unsurpassed customer care

At Equant, we back our products and services with our quality commitment. From day one, you can count on Equant for around-the-clock network monitoring and management with local language support available in over 145 countries.

Find the answer that's right for you.

Equant is the recognized leader in providing data and IP services to corporate customers globally. We supply network services, as well as integration and managed services that connect multinational corporations around the world. We work with you to solve complex business problems so the answers we create together are the answers that work for you.

Ask your business development manager for more details on how Equant can provide the answers to your business needs.
